

# Whitepaper

## **The Unstoppable** **Finance Suite**

The WallStreetNinja finance suite (WSNS) is a complete decentralized finance solution, where users can access the DeFi ecosystem chain of their choice, in a more simplistic manner, broadening accessibility and fostering mainstream adoption.

We feel the barrier to adoption is the need to install browser extensions and smartphone wallet apps. There are already a multitude of protocols and liquidity available within the DeFi ecosystem, but largely inaccessible to the average person. Essentially we want to give people accessibility to existing infrastructure in a more user friendly fashion.

Our solution is to provide an easy to use web application that does not require browser extensions or userside web3 plugins. Instead we intend to take advantage of blockchain relay and protocol APIs such as Pocket Network and 1inch.

In sticking with the decentralized nature of the ecosystem, we intend to host the suite on Dfinity's Internet Computer, which will also provide a single sign-on facility via Dfinity's Internet Identity, however initially we will also provide an option for password (with seed phrase backup) with 2fa sign-on.

The most popular technology device in the world is the mobile phone. There are 5.27 billion unique mobile phone users in the world today. WSNS will be accessible across the globe with multilingual support via mobile phone and desktop, making it the users personal decentralized finance solution.

# USP

- ❖ There are currently no fully decentralized DeFi platforms that allow such a broad range of functionality without the need to use web3 plugins.
- ❖ Single place to access a range of networks
- ❖ Complete decentralized stack
  - \* Computing
  - \* Data
  - \* Governance

# FEATURES

Lending

Farming

Rewards, NFTs and leveraged

Multi-chain wallet

Single sign-on using  
Internet ID (Dfinity)

Trading - Spot and Margin

Borrowing

Launchpad

API for third party  
integrations

# CORE TECHNOLOGIES

## Example Integrations

- ❖ 1inch (spot trading)
- ❖ Autofarm (farming)
- ❖ Opensea (NFTs)
- ❖ dYdX (margin trading)
- ❖ Aave (lending/borrowing)
- ❖ UniCrypt (launchpad)

Where native APIs are not available in order to add functionality, we will build our own application specific API hosted in a Internet Computer canister that will interact with the Pocket API.

## NETWORKS

# ROADMAP

We are currently developing prototypes and an MVP.

## TEAM

Our team is made up of a group of blockchain engineers, project managers, crypto marketers, community managers and experienced finance business operators who run as an anonymous collaboration. We are here to deliver a Decentralized Autonomous Organisation owned and governed by the token holders, known as the WallStreetNinja finance suite.

In the fast paced world of DeFi, where rules and regulations differ across the globe for the sale, purchase and handling of cryptocurrencies, personalities can only get in the way of operating in a truly decentralized fashion.

The team has taken the initiative to undertake KYC via industry leader Solidproof in order to demonstrate the legitimacy of the project and team.

**SOLID**Proof

# PROJECT INCUBATION

The project was incubated by:

- Darkpool Ventures - One of the cryptosphere's most disruptive startup incubators.

- Midas Touch Consulting - A market analysis firm specializing in precious metals and cryptocurrency.

# PROGRESS

We have completed various prototyping and an MVP. Currently, preparing to launch the product for public release.

# TOKEN ECONOMICS

Users are required to hold WSN tokens in their WSN wallet to access various features of WSNS.

## TOKEN UTILITY

- ❖ Burning
- ❖ Rewards
- ❖ Referrals
- ❖ Participation (farming)
- ❖ Staking  
(NFT's, Interest Bearing Tokens, Single Tokens, LP Tokens)

## DECENTRALIZED GOVERNANCE

- ❖ Proposals
- ❖ Voting
- ❖ Monetary control
- ❖ Participation rewards

## TOKEN STANDARD

\$WSN Tokens are BEP-20 standard issued on the Binance Smart Chain (BSC).

## TOKEN CONTACT ADDRESS

0x7FA4CD8AeEdCb8d36DBC5d856E3A1BEe490D7b36

## TOKEN SUMMARY

### Total Supply

1,000,000,000,000,000

### Initial Circulating Supply

36,483,333,333,333 (3.65% of Total Supply)

### Initial Market Cap

\$912,083

### Initial Fully Diluted Market Cap

\$25,000,000

## FUNDING ROUNDS

	<b>Supply</b>	<b>Tokens</b>	<b>Price (USD)</b>	<b>Amount (USD)</b>

# SUMMARY

Given the rapid expansion of DeFi, it seems logical that further adoption is inevitable, however, it requires an easy to use suite, such as the WallStreetNinja finance suite. Sign-on is made simple via Internet Identity and negates the need to use browser extensions and/or web3 plugins.

WSNS remains in line with the decentralized nature of DeFi, but takes it to the next level by decentralizing computing via Internet Computer and StackOS and blockchain relays through the Pocket Network. Pocket Network integration will facilitate interoperability, giving the user access to a broad range of networks and protocols.

Furthermore, the suite's governance itself will be decentralized. WallStreetNinja will no doubt become the people's finance suite.
